

Business and Information Technology Article

This is a sample B&IT article.

This will be uploaded shortly.

The default static Curriculum page can be replaced by the dynamic curriculum page.

To do this, rename the static curriculum menu item to "Static Curriculum" menu.

Then make the dynamic curriculum menu item (a link to the Blog - Content by Section) the child of the Top Menu.

Then move all the children of the Static Curriculum menu item children of the Curriculum menu item.

Then delete or unpublish the Static Curriculum item.
